

CAP6610 Homework 2

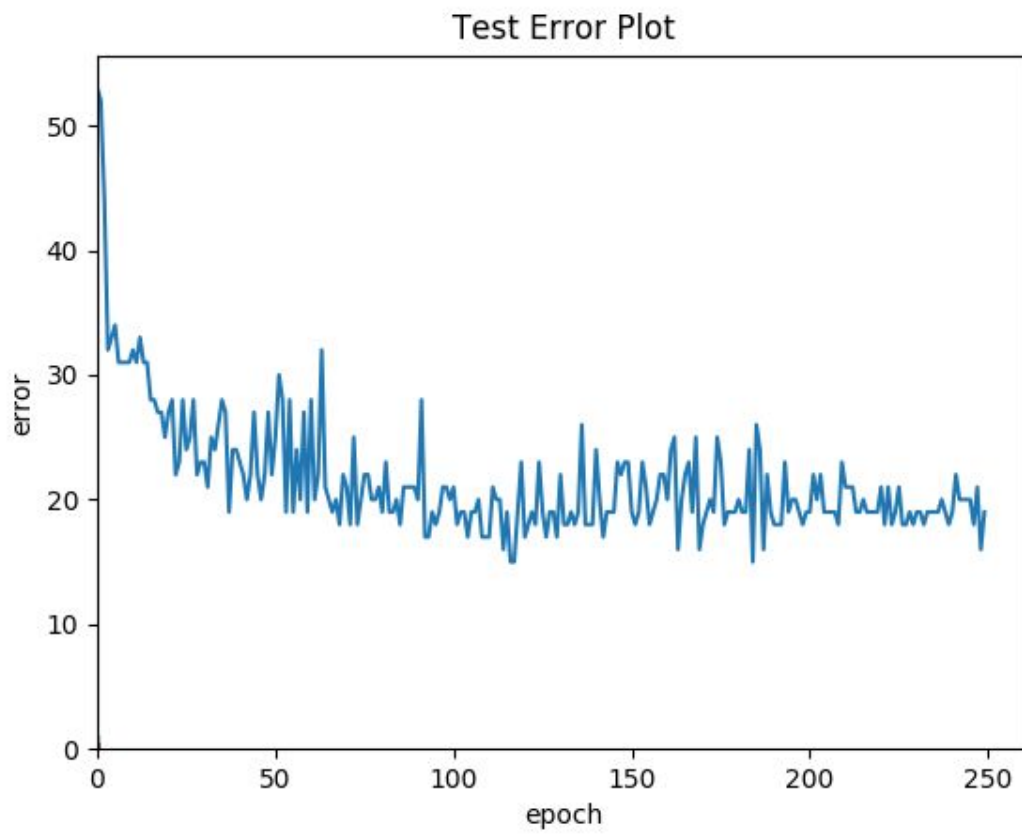

Decision Boundary visualized using dense labelling of grid points

Iterations: 151

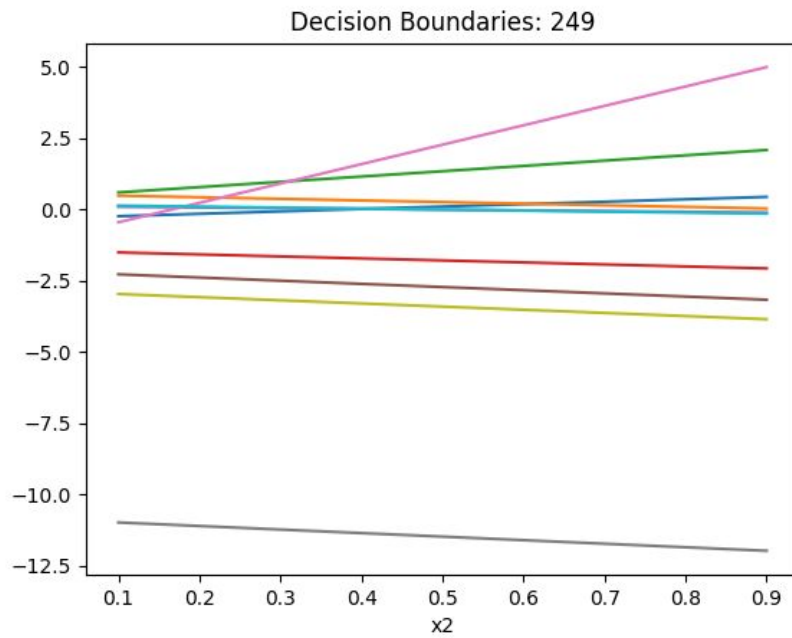

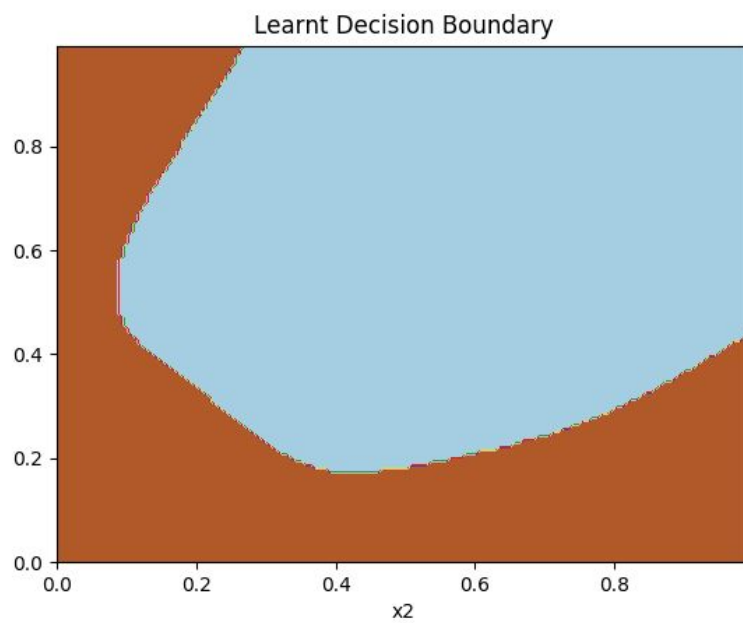

Training Samples: 100; Testing Samples: 100

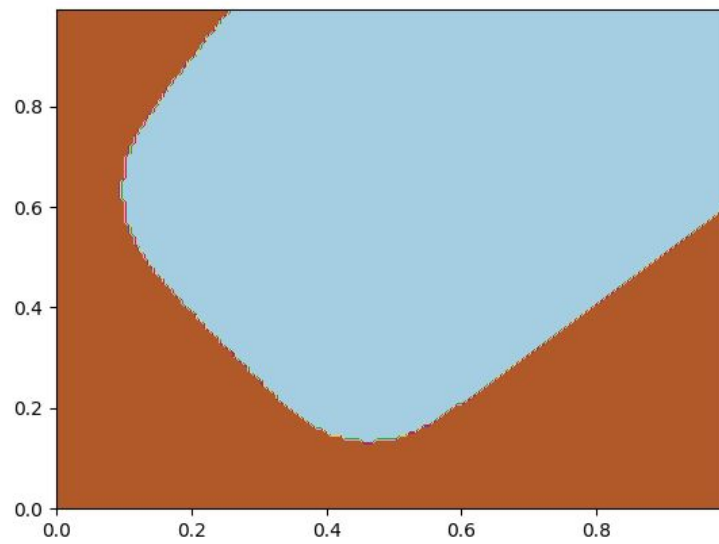

Decision Boundaries drawn as lines using wts of hidden units

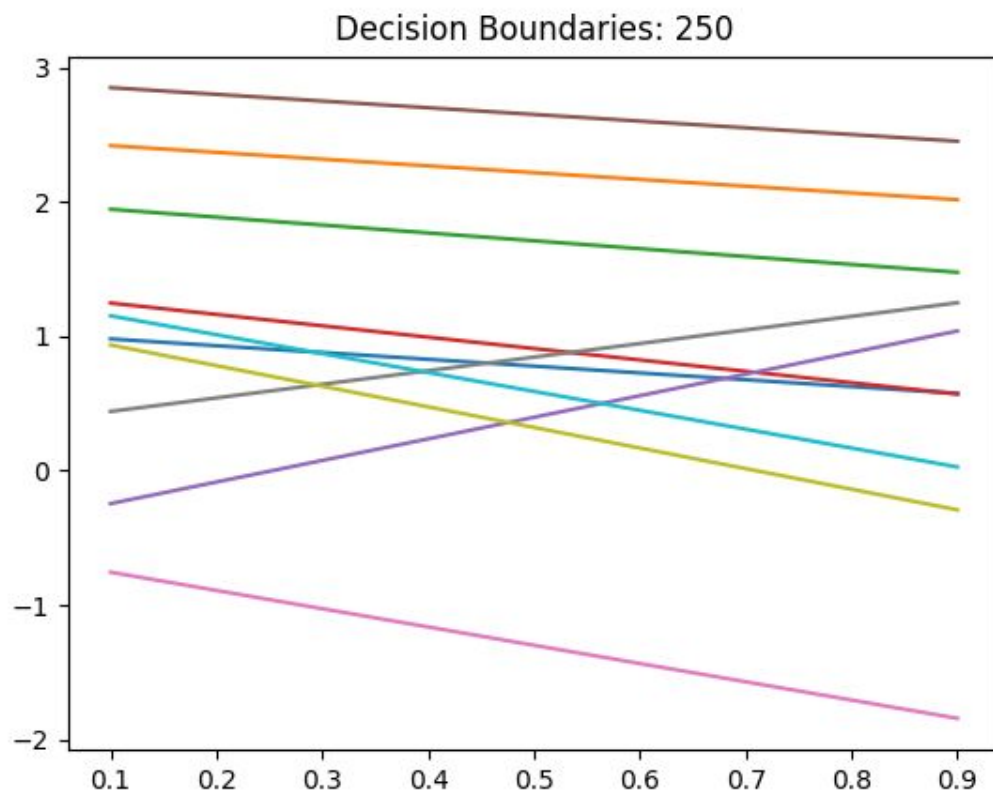

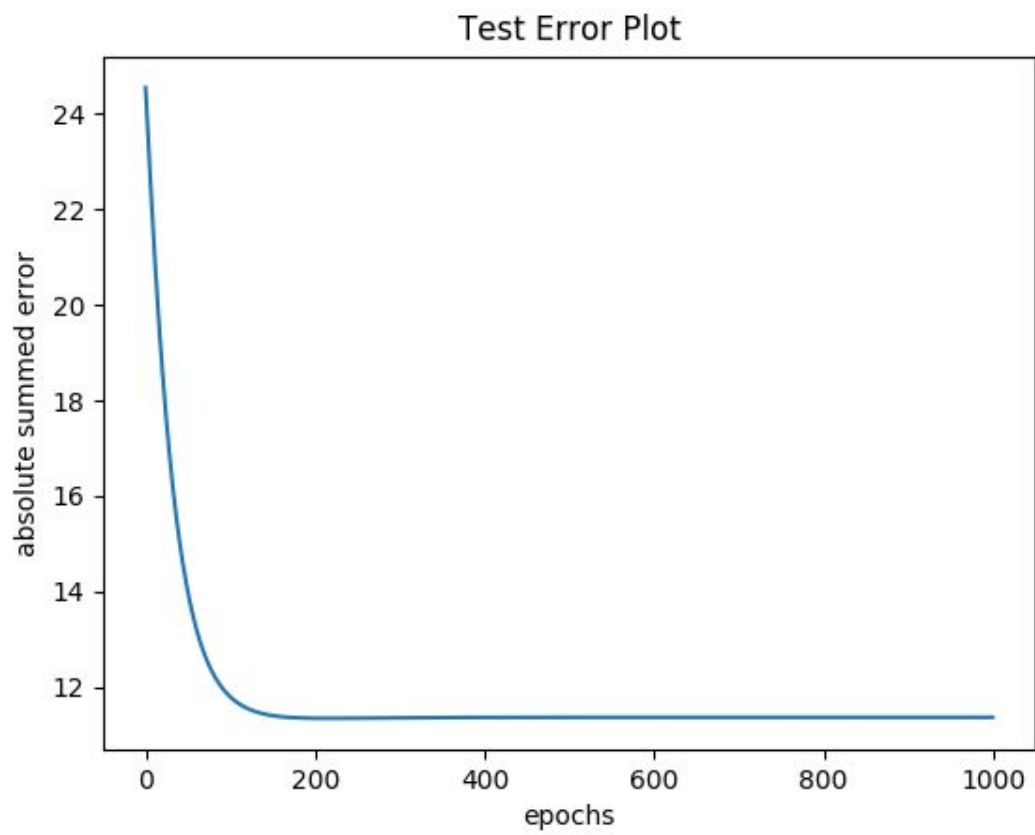

Test Error Function Drawn as a function of epoch count

Iterations: 250
Training Samples: 100
Weights with different initialization

[3] RNN Testing Error

The experiment was run multiple times to get convergence
